

# BT + IR SLIM

## FaSTBox Remote Control

## PRODUCT OVERVIEW

The BT + IR Slim Remote Control is ideal for projects requiring a small, simple remote with a strong receiving signal. It features four programmable buttons (power, mute, volume +, volume -), operates over Bluetooth, and includes infrared functionality.

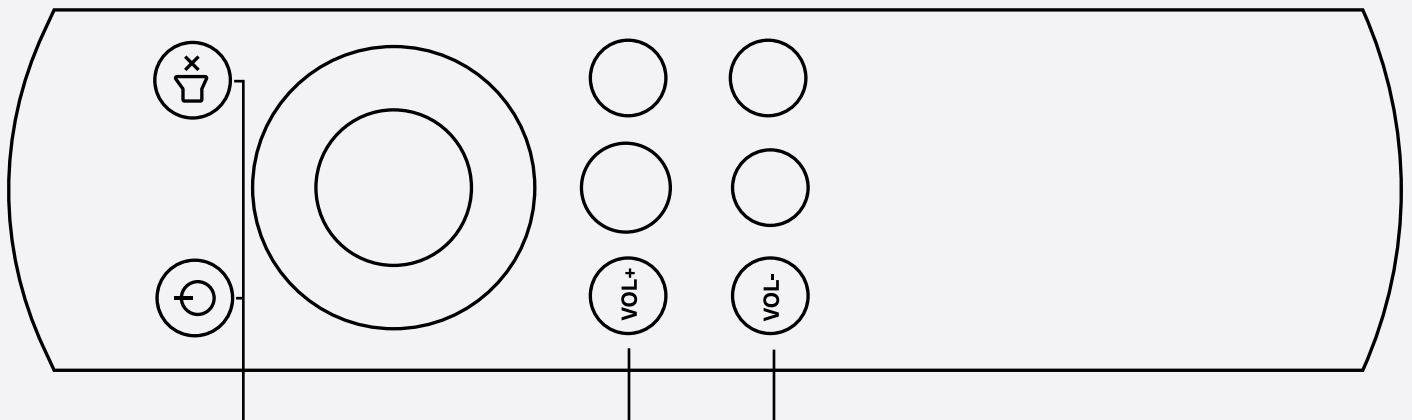

The remote uses two AAA batteries (not included unless specifically requested) and requires pairing along with potential software upgrades.

The remote works seamlessly with most Nevron STB devices without the need for reprogramming, making it a versatile single remote solution for guest rooms. Featuring programmable buttons, this remote can function as the single remote in a room, removing the need for the original TV remote.

There is no need for IR or RS232 cables, as the signal is transmitted over the Bluetooth connection.

## FUNCTIONALITY

### 4 PROGRAMMABLE BUTTONS

Power, mute, volume down, volume up.
