

Nevron Server Lite

Server used for Nevron solutions

PRODUCT OVERVIEW

Welcome to our comprehensive digital solutions to engage guests and grow revenue. Together, these solutions create a robust, scalable, and secure ecosystem for managing, delivering, and protecting of provided digital services and content.

NEVRONWARE IPTV

Purpose: Nevron IPTV middleware is designed to efficiently manage and deliver IPTV digital services. It provides an intuitive interface for administrators and an engaging experience for end-users, ensuring seamless content organization and delivery.

STREAMRON TRANSCODER

Purpose: The Nevron Transcoder software is essential for converting video content into various formats. It ensures optimal video quality and compatibility across different devices, enhancing the viewer's experience.

WIDEVINE DRM

Purpose: Crucial software component for securing digital content. Widevine DRM protects your content from piracy and unauthorized access, ensuring that your intellectual property remains secure while delivering a seamless and secure viewing experience to your audience.

STREAMRON VOD

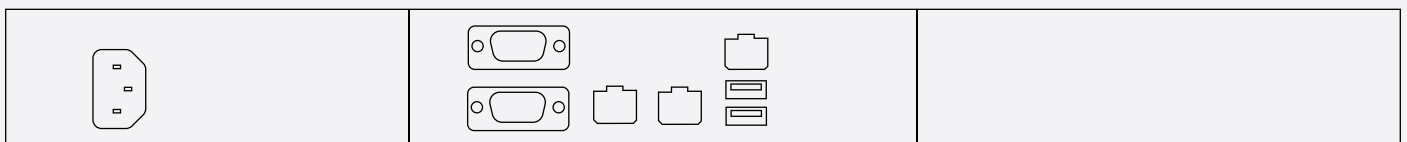

Purpose: With Streamron VOD, we ensure you have complete control over your entertainment experience, ensuring you can watch and listen on your own terms. Enjoy your favorite movies and music on-demand, wherever you are. This product allows you to easily access, manage, and stream audio and video content from both local and remote storage.

NEVRON DIGITAL SIGNAGE

Purpose: Enhances brand presence and engages guests in different accommodation types by showcasing services, offers, and information through dynamic public displays. Easily managed and updated, this solution allows our clients to tailor content in real-time, effectively advertising amenities and events in common areas to improve guest experiences and communication.

PORTS

TECHNICAL SPECIFICATIONS

Hardware

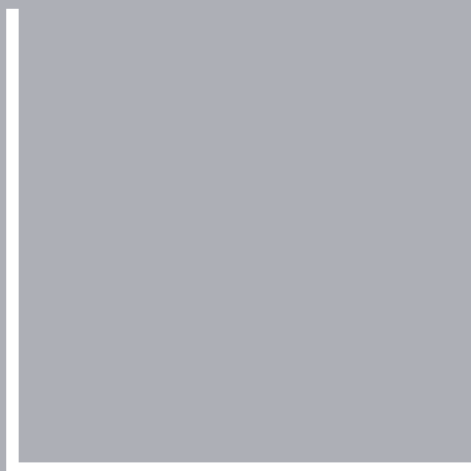

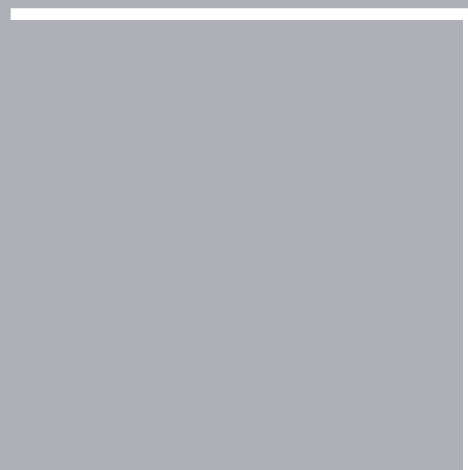

Motherboard	ASRock Rack AM4 Server Motherboard with IPMI and dual network interfaces
CPU	AMD Ryzen 6-core
